

Our intuitive platform makes it easy to invest.

The online platform is an easy-to-use client-facing system that allows you to keep track of the progress of your investments at all times. The platform is connected to a corporate API trading station. This means that when shares go live you can securely login to your account and view any private shares held and their current value on your account. You can also edit any personal details keeping your account up to date.

If you are a fund member you can increase your holding in companies that you believe have the strongest forecast straight from the platform.

When companies are listed the shares go live and you can see their live prices connected to the trading station. You will have several options including to 'sell' (liquidate) your shares and draw the capital from your account keeping you in complete control of your portfolio.

Company	Amount Invested	Current Balance	% Made/Lost	Profit Made/Lost
bet+	£10,000.00	£10,000.00	96%	£0.00
